

## The process of our testing service in more detail:

1: We personalise the service/test criteria on your needs.
2: You send the products to my adress in a maximum of 2 days before our service starts.
3: The products will be sent to the testers that you/I chose to test the product.
4: The testers test the products during their football match/training, and during an individual training I will set up for them. All of the testers will test for the agreed upon duration of the testing service per tester.
5: While testing, the testers fill in the test criteria based on their own opinion.
6: The testers make a short video showcasing how they tested the product in more detail.
7: The testers send these insightfull reports and videos to me.
8: The results will be judged, to perfect the service for you.
9: A summary report will be made of the good points and the points of improvement, that were mentioned a lot in the criteria of testers.
10: I will send this summary report and the individual reports of every tester to your company, along with the videos of them showcasing their testing, all within the agreed upon deadline.
11: The payment needs to be done within one month after we provide our testing service, or else the pricing of the service goes up.
12: With your consent, we will ask for a final review of our service.
